1. Project Overview

1.1 Project Summary

ReeVue is a professional company review platform designed to empower job seekers, employees, and professionals with transparent, community-driven insights into workplace culture, management quality, and interview processes. The platform is positioned as a premium editorial experience — closer in feel to a curated professional journal than a conventional job board.

1.2 Problem Statement

Professionals lack a trustworthy, aesthetically refined space to share and access candid company reviews. Existing platforms prioritise data density over user experience, resulting in cluttered, low-trust interfaces that discourage authentic contribution.

1.3 Project Objectives

- Provide a seamless, editorial-quality interface for browsing and submitting company reviews.
- Build trust through transparent community content and anonymous contribution options.
- Reduce friction in the job search and interview preparation process.
- Establish a distinctive visual identity that differentiates ReeVue from competitors.

1.4 Target Users

User Type	Description
Job Seekers	Individuals researching potential employers before applying or accepting offers.
Current Employees	Professionals sharing insights on workplace culture, management, and growth.
Interview Candidates	Users preparing for interviews who need company-specific Q&A insights.
HR Professionals	Recruiters monitoring company reputation and community sentiment.

2. Design System

2.1 Design Philosophy — The Editorial Curator

The guiding principle for ReeVue's design system is The Editorial Curator. Unlike data-heavy platforms that feel like spreadsheets, ReeVue treats community insights as high-end editorial content. The system moves away from the utility-first aesthetic of competitors toward a space that feels authoritative, serene, and deeply intentional.

Asymmetric whitespace and tonal layering replace conventional grid rigidity. Boundaries are defined through background-color shifts rather than divider lines — a No-Line rule that creates a soft, integrated, and expansive UI.

2.2 Color Palette

	Color	Hex	Usage
	Primary (Deep Sea Teal)	#00535B	Primary CTAs, headers, key accents
	Primary Container	#006D77	CTA gradient endpoint, hover states
	Surface Container Low	#E6F4F5	Secondary content areas, section backgrounds
	Surface	#F8F9FA	Base page background
	Surface Container Lowest	#FFFFFF	Interactive cards, elevated content
	On Surface	#191C1D	Primary body text
	Outline Variant	#BEC8CA	Ghost borders (used at 15% opacity only)

2.3 Typography

ReeVue uses a dual-font system to balance approachability with professional authority.

Font	Role	Sizes Used	Context
Manrope	Display / Headlines	display-lg, headline-md	Landing pages, major section headers, brand voice
Inter	Body / UI Labels	body-lg, label-md	Review cards, functional text, metadata

2.4 Component Design Rules

Buttons

- Primary: Gradient fill (#00535B → #006D77 at 135°), on-primary text, fully rounded corners.
- Secondary: Surface-container-highest background, on-surface text. No border.
- Tertiary: Transparent background, primary-colored text, subtle underline on hover.

Cards

- Corner radius: 12px (md) for all standard cards.
- No divider lines between list items — use vertical spacing or background toggles.
- Shadow: 0px 12px 32px rgba(25, 28, 29, 0.06) — derived from on-surface to preserve tonal depth.

Star Ratings & Badges

- Filled stars use primary-container color. Empty stars use outline-variant at 30% opacity.
- Difficulty badges: left 2px accent border only — Easy (Forest Green), Medium (Amber), Hard (Error Red).
- Anonymous badges: surface-variant pill with label-sm typography — understated by design.

Input Fields

- Fill: surface-container-lowest (#FFFFFF). Ghost border using outline-variant.
- On focus: border transitions to primary (#00535B) at 100% opacity + 4px soft outer glow.

The No-Line Rule

Standard 1px borders are strictly prohibited for sectioning. Boundaries are defined exclusively through background-color shifts between surface hierarchy tiers. This creates a soft UI that feels integrated and expansive — a core differentiator of the ReeVue aesthetic.

3. Screen-by-Screen Analysis & Design

Screen 1: Login / Sign Up

Role	Authentication gate — the first screen every user encounters. Sets the brand tone immediately.
User goal	Authenticate quickly and securely to access the platform.

Key UI Elements

- ReeVue logo and tagline centered above the form
- Email and password input fields with ghost-border styling
- Primary CTA button: gradient fill, fully rounded
- Toggle between Login and Sign Up modes
- Social login options (Google, LinkedIn)
- Forgot password link — tertiary button style

Screen Design

Caption: Login / Sign Up screen design

Screen 2: Home Page

Role	Central navigation hub post-login. Surfaces trending content, quick actions, and primary navigation.
User goal	Get an immediate overview of platform activity and navigate to key areas.

Key UI Elements

- Sticky glassmorphism top navigation bar with search input
- Personalised welcome message and quick-stats strip
- Trending companies preview carousel (top 3)
- Recently viewed companies list
- Bottom navigation: Home, Search, Trending, Notifications, Profile
- Floating Action Button (FAB): Submit a Review

Screen Design

Caption: Home Page screen design

Screen 3: Trending

Role	Discovery page surfacing the highest-momentum companies based on community engagement.
User goal	Discover which companies are gaining attention and explore emerging employers.

Key UI Elements

- Weekly Pulse editorial hero card (teal background, Manrope display font)
- Top Momentum ranked list with company logos, star ratings, and review counts
- Filter chips: Industry, Rating, Size
- Save/bookmark icon on each company card
- Load more pagination at the bottom

Screen Design

Screen 4: Saved Companies

Role	Personal bookmarks list — companies the user has saved for later review or reference.
User goal	Quickly revisit companies of interest without searching again.

Key UI Elements

- Saved companies list with company logo, name, industry tag, and average rating
- Empty state illustration with CTA to explore trending
- Remove from saved action (swipe or icon)
- Sort options: Recently Saved, Highest Rated, Alphabetical

Screen Design

Caption: Saved Companies screen design

Screen 5: Search Results

Role	Primary research tool for discovering and filtering companies across the platform.
User goal	Find specific companies and narrow results to the most relevant options.

Key UI Elements

- Persistent search bar with active query displayed
- Filter panel: Industry, Rating range, Company size, Location
- Results count and active filter chips
- Company result cards: logo, name, industry, star rating, review count
- Sort: Most Reviewed, Highest Rated, Most Recent
- Save icon on each result card

Screen Design

Caption: Search Results screen design

Screen 6: Company Profile

Role	The core content page — provides a comprehensive view of a company's culture, ratings, and community feedback.
User goal	Research a company in depth before applying or accepting an offer.

Key UI Elements

- Company hero section: logo, name, industry, location, overall rating
- Rating breakdown: Work-Life Balance, Management, Growth, Culture (star ratings)
- Tab navigation: Overview | Reviews | Interview Q&A | Photos
- Review cards: anonymous badge, star rating, role, date, body text
- Difficulty badge on interview cards (Easy / Medium / Hard)
- Submit a Review CTA (sticky or floating)
- Save company button in the header

Screen Design

Screen 7: Interview Q&A

Role	Company-specific interview preparation page — community-sourced questions and answers.
User goal	Prepare effectively for a specific company's interview process.

Key UI Elements

- Company header with name and overall interview difficulty badge
- Question list: role, date, difficulty badge, upvote count
- Expand to reveal answer/tips inline
- Filter by role or difficulty
- Submit your own question CTA
- Anonymous submission toggle

Screen Design

Screen 8: Submit a Review

Role	Contribution form — allows users to rate and describe their experience at a company.
User goal	Share honest feedback to help others make informed career decisions.

Key UI Elements

- Company name at top (pre-filled from context)
- Star rating selectors for each dimension: Overall, Work-Life Balance, Management, Culture, Growth
- Employment status selector: Current / Former Employee
- Role / position text field
- Pros text area
- Cons text area
- Anonymous toggle with privacy note
- Submit button (primary gradient CTA)

Screen Design

Screen 9: My Profile

Role	Personal account management screen — history, settings, and contribution stats.
User goal	Manage account details and review personal contribution history.

Key UI Elements

- User avatar, display name, and member-since date
- Contribution stats: Reviews Written, Companies Saved, Q&As Submitted
- My Reviews list (compact cards)
- Account settings: Edit Profile, Change Password, Notification Preferences
- Privacy settings: Manage anonymous submissions
- Sign Out option

Screen Design

Screen 10: Notifications

Role	Utility screen for platform alerts, activity updates, and engagement notifications.
User goal	Stay informed about activity relevant to saved companies and personal contributions.

Key UI Elements

- Notification list with unread indicator (teal dot)
- Notification types: New review on saved company, Review helpful votes, Q&A reply
- Timestamp for each notification
- Mark all as read action
- Empty state: friendly illustration and prompt to save companies
